Project goals and objectives.

- To create an automatic system that follows complete final year project life cycle.
- Maintain repository of all project.

Project Features.

- Project Repository.
- Initiate a group or join an existing group.
- Choosing supervisor.
- Timeline.
- Batch tasks.
- Meeting logs.
- Send Messages.

Final Year Project Managements system follows complete final year project's life cycle.

It is automation of manual tasks in FYP. It maintains Project repository and their documents. It handles Notifications and deadlines. It is fully automated system with online availability. It will also maintain student and supervisor meeting logs. It also allows external examiner to review and evaluate projects

Tools and components used.

Php
MySQL
JavaScript
Jquery, Ajax
Bootstrap, media queries

Scope:

The market survey tells us that are very few universities have system to handle Final year projects while most of universities in Pakistan either uses their default Virtual Learning Environment (VLE) to deal with Final Year Project tasks or handle all tasks manually. However there is no custom made solution available for management of Final Year.
